

MATH 1110 - Week 1 Recitation

Hunter Carroll

August 17, 2026

Outline

- 1 MATH 1110 Recitation Overview
- 2 Introductions
- 3 First Day Activity
- 4 Syllabus
- 5 Week 1 - Day 2 Recitation
- 6 Community Norms
- 7 Factoring Review
- 8 Radicals
- 9 Simplification
- 10 Exponents
- 11 Expanding Binomials
- 12 Factoring Practice
- 13 Ticket Out the Door

Our Recitation

- **Our Class:** MATH 1110-R03 10:00AM - 10:50AM or MATH 1110 - R04 11:00AM - 11:50AM
- **Your Recitation Instructor:** Hunter Carroll
- **Your Main Instructor:** Dzung Nguyen
- **Contact:** Hunter.Carroll@ucdenver.edu
- **Classroom:** NORTH 1603
- **Office Hours:** Monday and Wednesdays from 9am-10am in the Student Commons building room 4312

When you're taking a math test and forgot all the equations

Get to Know Each Other

Take a few minutes to get to know each other:

- 1 Exchange Names
- 2 Your major and year
- 3 Career goals
- 4 Where you are from
- 5 Some of your favorite hobbies
- 6 Find 5 things your table has in common that are not physical and are not related to CU Denver. We will share out a couple with the class.

First Day Activity

- 1 You will all get pipe cleaners as a group. Create a sculpture or creation out of the pipe-cleaners.
- 2 Write down the instructions to re-create the object.
- 3 I will then collect both instructions and the objects to have other groups try and follow your instructions to recreate the object.
- 4 As a group discuss what you noticed about the process? what did you wonder? what do you think the point of the activity was?

Syllabus Overview

We are now going to transition to Canvas to go over the syllabus and what to expect moving forward.

Day 2 Recitation - August 19, 2026

The plan:

- Community Norms Activity
- Factoring Review

Community Norms

- 1 Share an experience when you've had a positive experience working in groups.
- 2 Share an experience when you've had a negative experience working in groups.
- 3 Expectations for me as your instructor.

Reflect on this shortly and prepare to write down a list of community norms and expectations for how you want to be treated and how you want to treat each other as you work in groups this semester. We will have each table share their expectations.

Factoring Review

We are going to now work on the following activity [sheet](#).

Two Truths and a Lie - Radicals

(Assume all variables represent positive real numbers.)

a) $\sqrt{x^2 + y^2} = \sqrt{x^2} + \sqrt{y^2} = x + y$

b) $\sqrt{\frac{36}{x^2}} = \frac{\sqrt{36}}{\sqrt{x^2}} = \frac{6}{x}$

c) $\sqrt{a^2 b^2 c^4 d^8} = abc^2 d^4$

Two Truths and a Lie - Simplification

(Assume all variables represent positive real numbers.)

a) $\frac{x}{x(x-4)} = \frac{1}{x-4}$

b) $\frac{y}{a+b} = \frac{y}{a} + \frac{y}{b}$

c) $\frac{x+y}{b} = \frac{x}{b} + \frac{y}{b}$

Two Truths and a Lie - Exponents

(Assume all variables represent positive real numbers.)

- a) $x^5 x^2 = x^7$
- b) $(a^2)^3 = a^6$
- c) $\frac{x^6 x^4}{x^3 y} = x^2 y^4$

Two Truths and a Lie - Expanding Binomials

(Assume all variables represent positive real numbers.)

- a) $(x + 2y)^2 = x^2 + 4y^2$
- b) $(2a + 3b)^2 = 4a^2 + 12ab + 9b^2$
- c) $(-4x^2 + 1)^2 = 16x^2 - 8x + 1$

Factoring Practice

① $4x + 8y + 16z$

② $3xy^2 + 6x^3y - 15x^2$

③ $\frac{x^2 + x}{x}$

④ $x^2 - 4$

⑤ $x^2 + 5x + 6$

⑥ $x^2 - 2x - 8$

⑦ $2x^2 - 5x - 3$

⑧ $\frac{x^2 - 16}{2x^2 + 7x - 4}$

Ticket Out the Door

We will start this at the end of week 2.

- 1 What are you struggling with the most in the class?
- 2 What do I, the student, need to do differently to improve?
- 3 What do I, the instructor, need to do differently to improve your learning?
